Macodyne’s modern elastoforming presses feature a high degree of versatility as embossing, bending, and trimming operations can occur simultaneously with an unprecedented degree of accuracy.

Macodyne Elastoforming Press Benefits:
- Rapid, low cost prototyping
- Low tooling costs
- Lower operating and capital costs and faster cycle times than fluid cell type presses

In addition to supplying new custom Elastoforming hydraulic presses, Macodyne provides comprehensive service, rebuild and upgrade options for existing presses of all makes and models.
