Macrodyne hydroforming presses are designed for the manufacture of both solid and hollow components with complex geometries and high level of torsional rigidity.

Macodyne Hydroforming Presses are designed for both high and low pressure complex hydroforming applications involving sheet or tubular based parts. Our presses are fully integrated with high pressure water systems and associated precise and flexible control systems.

Macodyne’s hydroforming presses can be supplied complete with a wide variety of ancillary equipment including robots, in-press transfer systems, exit conveyors, automated die storage & retrieval systems and more.

Macodyne hydroforming presses have a variety of available options including:

• Intensifier units up to 80,000 psi
• Multi-axis feed cylinder assemblies
• Quick die change packages
• Data acquisition packages
• Remote diagnostics packages

In addition to supplying new custom Hydroforming hydraulic presses, Macodyne provides comprehensive service, rebuild and upgrade options for existing presses of all makes and models.
